

DTS[®]

Newsletter

July 2008

The DTS service now supports Foreign Exchange (FX) deposits.

Creating a foreign currency deposit using DTS is easy. Simply enter in the amount of each type of foreign currency and DTS will convert it to the US Dollar equivalent.

DTS enables customers to manually enter exchange rates or supports the automatic entry of exchange rates from your depository banks directly into the DTS system.

In either case, once the exchange rate and the foreign currency amount(s) are entered, the DTS system automatically converts your foreign currency into US dollar values and creates a deposit.

To learn more please go to <http://www.aboutdts.com>

By the way...

Change orders are now occurring on the DTS system. Customers can order, track and verify their currency and coin orders online, quickly and efficiently, by using DTS.

Please contact Jason Stambaugh at (410) 876-5756 if you have any questions or would like to see a demonstration.
